

AUTHOR INDEX

Volume 57 (1985)

- Baartmans, A. and M.S. Shrikhande, A characterization of the extensions of symmetric designs (Note) (3) 301–305
- Bagchi, B. and N.S.N. Sastry, Minimum weight words of binary codes associated with finite projective geometries (Note) (3) 307–310
- Bednarek, A.R. and R.E. Osteen, A characterization of graphical covers (Communication) (1,2) 155–158
- Brand, N., Isomorphic designs that are not multiplier equivalent (Communication) (1,2) 159–165
- Buset, D., Orbits on vertices and edges of finite graphs (Communication) (3) 297–299
- Camina, A.R., Automorphism groups of block designs which are block transitive (1,2) 1–7
- Carnielli, W.A., On covering and coloring problems for rook domains (1,2) 9–16
- Cavicchioli, A., Lins–Mandel crystallizations (1,2) 17–37
- Chadjipantelis, T. and S. Kounias, Supplementary difference sets and D -optimal designs for $n \equiv 2 \pmod{4}$ (3) 211–216
- Clapham, C.R.J., The bipartite tournament associated with a fabric (Note) (1,2) 195–197
- Everett, M.G. and S.B. Seidman, The hull number of a graph (3) 217–223
- Goodman, A.W., Triangles in a complete chromatic graph with three colors (3) 225–235
- Goulden, I.P., A bijective proof of the q -Saalschütz theorem (1,2) 39–44
- Haussler, D., Another generalization of Higman's well quasi order result on Σ^* (3) 237–243
- Hopkins, G. and W. Staton, Graphs with unique maximum independent sets (3) 245–251
- Howard, F.T., Degenerate weighted Stirling numbers (1,2) 45–58
- Jackson, B. and O. Ordaz, A Chvátal–Erdős condition for $(1,1)$ -factors in digraphs (Note) (1,2) 199–201
- Koubek, V. and J. Rajlich, Combinatorics of separation by binary matrices (Note) (1,2) 203–208
- Kounias, S., see T. Chadjipantelis (3) 211–216
- Lehel, J., A characterization of totally balanced hypergraphs (1,2) 59–65
- Leroux, P. and V. Strehl, Jacobi polynomials: Combinatorics of the basic identities (Communication) (1,2) 167–187
- Lins, S., A simple proof of Gagliardi's handle recognition theorem (3) 253–260
- Lins, S. and A. Mandel, Graph-encoded 3-manifolds (3) 261–284
- Mandel, A., see S. Lins (3) 261–284
- Myers, R.W. Jr., 1-Homogeneous graphs (1,2) 67–88
- Odlyzko, A.M., J. Pintz and K.B. Stolarsky, Partitions of planar sets into small triangles (1,2) 89–97
- Ordaz, O., see B. Jackson (1,2) 199–201
- Osteen, R.E., see A.R. Bednarek (1,2) 155–158
- Pesch, E. and W. Poguntke, A characterization of absolute retracts of n -chromatic graphs (1,2) 99–104
- Peter-Orth, C., All solutions of the Soma cube puzzle (1,2) 105–121
- Pintz, J., see A.M. Odlyzko (1,2) 89–97
- Poguntke, W., see E. Pesch (1,2) 99–104
- Rajlich, J., see V. Koubek (1,2) 203–208
- Reznick, B., P. Tiwari and D.B. West, Decomposition of product graphs into complete bipartite subgraphs (Communication) (1,2) 189–193
- Ruiz, S., Randomly decomposable graphs (1,2) 123–129

- Sastry, N.S.N., see B. Bagchi (3) 307–310
- Seidman, S.B., see M.G. Everett (3) 217–223
- Shrikhande, M.S., see A. Baartmans (3) 301–305
- Staton, W., see G. Hopkins (3) 245–251
- Stolarsky, K.B., see A.M. Odlyzko (1,2) 89–97
- Strehl, V., see P. Leroux (1,2) 167–187
- Tarnanen, H., On character sums and codes (3) 285–295
- Tiwari, P., see B. Reznick (1,2) 189–193
- Torgašev, A., On graphs with a fixed number of negative eigenvalues (Note) (3) 311–317
- Vesztergombi, K., On the distribution of distances in finite sets in the plane (1,2) 129–145
- Wagner, D.K., On theorems of Whitney and Tutte (1,2) 147–154
- West, D.B., see B. Reznick (1,2) 189–193
